Outstanding Set of Keynotes

Delegates to ICIN 2013 in Venice, October 15-16, will benefit from outstanding keynote presentations providing insights into the future of network services and applications.

Details of the ICIN 2013 keynotes can be found here and full details of the ICIN 2013 Advance Programme including technical sessions and tutorials can be downloaded here.

The ICIN 2013 conference covers telecoms and web services and service architectures from both technical and business perspectives.

ICIN 2013 Keynotes

Architecture Evolution – Some Observations on Recent Developments

Four emerging technologies will have a significant impact on the evolution of communications networks: software defined networking (SDN); service exposure; the emergence of analytics tools (and their connection to big data technologies); and the ability to extract knowledge and insights by studying the information that flows through the networks. And finally, underpinning all of the above: cloud based deployment technologies. How do these four areas interrelate and interwork?

Ulf Olsson, Senior Expert, Ericsson Group Function Technology, Sweden

New Security Challenges Facing Cloud and Mobile Expansion

The proliferation of new devices with 4G capabilities is driving a huge expansion in the use of new devices worldwide. New security challenges are emerging. Is there an argument for telcos to reduce the capabilities of the new mobile devices? Should the cloud be an open standard or should each telco deploy their own flavour of cloud services for the protection of their customers and their business?

Juan M. Velasco, CEO, Aiuken Solutions, Spain

Strategies for the Creation of New Network Services

As part of efforts to improve our research and development (R&D) activities; we need to speed up our service-related R&D. This presentation introduces our approaches for this, from visualizing services to conducting trials on R&D cloud environment called XFARM. The presentation covers some frameworks for service creation that we use, and it also shows some innovative service examples using video experience.

Naoki Uchida, Vice President, Executive Producer, Research and Development Planning Department, NTT Service Evolution Laboratories, Japan

REGISTER NOW! Early Bird rates are in effect through 13 September!

As the chairmen of the Technical Programme Committee and International Advisory Board, we look forward to welcoming you in Venice at ICIN 2013.
